

Bolt-On Cherokee Conversion

Rock Krawler Suspension has released the Cherokee Comp 65 X Factor Plus long-arm suspension system with rear coil spring conversion. This new suspension system fits '90-and-newer XJs and is designed to provide Cherokees with 6.5 inches of lift in the front and 5.5 inches in the rear. The rear of the kit features a coil conversion, a triangulated four-link, and adjustable bumpstops. All components bolt in place or are located off stock parts for easy installation. Information: Rock Krawler Suspension, 518/270-9822, rockkrawler.com

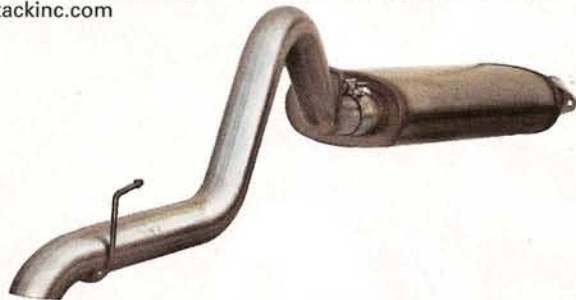

Easy Overdrive

The AX-15 transmission has been overlooked in the swapping world for more expensive transmissions that are arguably better but harder to find parts for. However, for 11 years, this was the overdrive of choice in Jeep vehicles. Now Advance Adapters offers new AX-15 transmissions direct from Aisin. Equipped with a 21 percent gas-saving overdrive, these transmissions make an excellent upgrade for Jeeps '80 to current. Information: Advance Adapters Inc., 805/238-7000, advanceadapters.com

Bulletproof Tachometer

Stack, a company with over 25 years of experience in motor-sports, is now entering the 4x4 world. The ST200 Clubman Tachometer features a billet aluminum casing that is fully sealed against dust and moisture, pushbutton programming, a tattletale memory, and a simple four-wire hookup. With LED backlighting and a variety of pointers and rpm ranges, this is the tachometer for your off-road Jeep. Information: Stack, 888/867-5183, stackinc.com

Monster Mach Force

If you've got a '91-'95 Wrangler and are looking for a bigger exhaust, then this is for you. Advanced Flow Engineering has released the Mach Force-XP, a 3-inch-diameter, mandrel-bent, 409 stainless steel after-cat system. With a 4-inch high-flow stainless muffler and bayonet-style hangers, and boasting 192 percent increase in flow over the stock exhaust, this is the biggest kit available. Information: Advanced Flow Engineering, 951/493-7100, afefilters.com

G-Floor Garage Flooring

If you don't want to deal with snap-together floors, and don't trust the brush-on stuff, check out this 10-foot-wide roll-out polyvinyl pad. G-Floor is a low-cost alternative that applies quickly, has channels to direct spills out the door and keep dirt from blowing across the garage, and is impervious to all liquids that might leak (will leak) from your Jeep. It's available in a variety of patterns and colors to match whatever your garage or basement needs. Information: Better Life Technology, 913/894-0403, bltllc.com
