Herkules Unveils Oil Filter Crushers

Herkules Equipment Corporation's Oil Filter Crusher, model OFC4, crushes multiple filters or one large filter extracting up to 98 percent of the oil and reducing the filter size by 80 percent for clean, cost-efficient disposal. The OFC4 is powered by Herkules Air Bag technology, a maintenance-free, extremely durable power source that eliminates electrical and hydraulic hazards, providing a safe work environment. The dual door/latch interlock system is provided for operator safety during the 35- to 55-second crush cycle.

Extracted oil from the crushed oil filters flows from the chamber down to the drain outlet for easy collection. Oil from filters placed on the convenient shelf area flows down through the oil-drain grid to the drain outlet as well. The OFC4 produces 18 tons of crushing force with a required 120 psi. It also comes with a five-year warranty.

For more information, call 800.444.4351 or visit: www.herkules.us

Duracell Releases Advanced Generation Batteries

Advanced Generation Duracell batteries are especially designed to provide superior life and maintenance-free performance. The batteries feature Extra Heat Protection Technology, reinforcing its design to withstand today's increasing under-the-hood temperatures or severe service conditions. The extra reinforcement also helps enhance performance in colder weather conditions, extending life in any environment.

All Duracell automotive batteries are made with the most advanced computerized equipment to make the very best product. The batteries undergo stringent testing and quality control checks to ensure Duracell dependability.

Better Life Technology Introduces G-Floor

G-Floor from Better Life Technology can transform the look of a shop and be installed in seconds. The floor is easy to install, looks great and lasts for years.

G-Floor is a specially formulated 10-foot wide, roll-out polyvinyl pad. The flooring installs fast; simply roll it out and trim the edges. Also, it has channels that direct run off out the door, preventing dirt from migrating across the floor and acting as an effective water and vapor barrier.

The flooring is also easy to clean and impervious to oil and other fluids leaked from cars.

The flooring hides cracks and stains in current shop floors and makes old floors look like new at a low cost. The flooring also comes in a wide variety of colors and patterns.

EnviroClean Solutions Introduces Floor Check

The EnviroClean Solutions Floor Check

dual action cleaning product is specially formulated to provide excellent cleaning and degreasing results, as well as imparting a unique no-slip technology to hard surfaces that helps reduce slip and fall accidents.

The non-toxic, 100 percent biodegradable formula can be used on a wide variety of surfaces including concrete floors, concrete pads, tile floors, marble and stone.

To use the product simply apply it to the surface with a brush, mop or auto-scrubber. Then, wait five to 15 minutes for maximum performance, and, finally, rinse clean with water.

Hi-Gear Introduces Nanox Glass Treatment

Hi-Gear recently introduced Nanox Glass Treatment which offers clearer visibility in all weather conditions. It reduces glare and improves driver comfort and safety. Water beading technology repels rain, sleet and snow and prevents ice and bugs from sticking to the windshield.

Nanox offers both interior and exterior solutions. The formula bonds to the treated surface to clean, protect and repel dirt on a molecular level.
