Anti Microbial /Anti Fungal Graphic Flooring

Durable Custom Graphic Flooring

50 mil clear print media

March 26, 2020

BILD® Print Media's Elite line of 50 Mil Products, is the ideal crossover product between our Ultra 35 and Premier 75. All offer the same great durability and versatility for any application. The Elite 50 Mil is light weight, easy to handle and installs with ease. Available in both Ceramic™ and Super Smooth™, the Elite 50 Mil Clear products are reverse printed so the image cannot be damaged. A perfect option for roll to roll printing with it's improved flexibility for media transfer.

This product is excellent for repositionable floor graphics, wayfinding, counter top mats and full wall to wall retail graphic floors.

Optional MicroLock Technology™ satin top coat is available for an added anti-microbial/anti-fungal barrier.

Safety First

How far apart is 6 feet? Using repositionable floor graphics, show customers exactly where to stand and adhere to social distancing guidelines.

The Difference

Common sheet vinyl products are not a new trend in the flooring industry. However, most products have the image under a very thin, clear wear-layer, with layers of heavy fillers and foam beneath. This looks great on the surface, but decreases the longevity of the floor with the use of fragile materials compacted together.

G-Floor Graphic® print media is a 100% solid polyvinyl flooring solution. Without heavy fillers and foams, this material is both lightweight and completely recyclable. G-Floor Graphic® print media is a floor that is guaranteed to outlast and outperform any

other polyvinyl product that is produced.

Designed to print sharp graphics at any size gives G-Floor Graphic® print media the advantage of fitting into any flooring environment. Complete a business office with a stunning stone floor. Integrate path-to-purchase strategies into a store to increase sales. Discover the leader in customizable polyvinyl sheet flooring with G-Floor Graphic® print media.

The Composition of G-Floor Graphic®

Standard Satin Top Coat

*Optional MicroLock Technology™ Top Coat

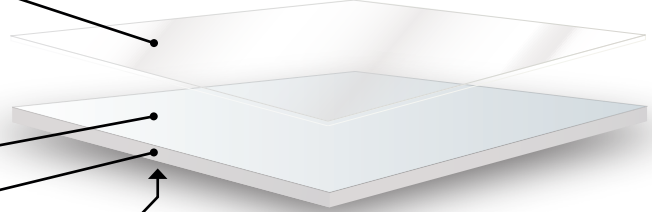

- Seals Surface for Easy Clean Up
- Reduces Staining
- Anti-Microbial / Anti-Fungal
