Using G-Floor® Roll-Out Flooring while flattening the curve

In an effort to assist the medical industry to combat the COVID-19 pandemic, Better Life Technology has transitioned some of our workforce from manufacturing typical garage flooring and print media materials to commercial/industrial/medical flooring. By combining resources from our standard G-Floor® formulation and adding our marine grade Anti-Microbial / MicroLock top coat, we have created a durable solution to supply flooring specifically for the medical sector. This new commercial/industrial grade roll-out flooring is UV sanitized during manufacturing and includes our toughest MicroLock Technology™ top coat, providing another layer of anti-microbial / anti-fungal protection.

Available in three solid colors; Absolute White, Midnight Black or Slate Grey, all products have a ceramic surface texture for slip resistance and easy cleaning and are available in 10' wide by 61' lengths.

Featured Products

Item Number	Item Description
FF50CT1061AWAMC	50 mil Ceramic Absolute White 10' x 61' with Anti-Microbial Top Coat
