2019 IMPROVEMENTS

SPUN BOUND BACKING

- Provides a more cushioned feel
- Helps absorb flooring imperfections
- Install to any substrate

LATEX PRINT

- Improved the clarity and resolution
- Very authentic wood grain pattern
- Improved UV resistance and provides a longer lasting quality image

TOP COAT

- Improved UV resistance
- Additional surface protection

FEATURES

Protect your boat deck from wood rot and more with slip resistant, durable, polyvinyl, AquaTread[®] marine flooring. In a variety of patterns and colors, customized to fit any interior, our flooring provides UV resistance for long-term color retention. Our marine flooring will hold its quality for years to come.

Performance

AquaTread marine flooring is a seamless, easy to install, slip-resistant, flame retardant, durable, high performing polyvinyl that is UV stable for long-term sun exposure, excellent color retention and low-maintenance cleaning. Our marine flooring products are installed on boat floors throughout the world.

Design

A variety of patterns and colors have been meticulously designed to create stunning, authentic wood and leather patterns, giving you the sharpest quality flooring your boat can have for your sport boat or luxury pontoon, without the expense and maintenance of real wood. AquaTread comes in standard widths of 8ft 6in or 10ft, and custom lengths, up to 75 feet, and in 75 mil to create not only design, but cushion and durability.

Durability

We print underneath a seamless, solid, 75 mil, UV-resistant polyvinyl, not on top or in between, so the patterns cannot be scratched off or damaged by heavy traffic, unlike other thin materials on the market. The seamless solid material offers superb moisture protection and resistance to oils, gas, fishing scents and more. Your boat floor covering will not deteriorate or smell, will clean quick and easy, and look good for years to come.
