

CLEAR WOODGRAIN

## FEATURES

Create an environment that your customers will love. Whether you are using brightly colored graphics as a source of way finding and leading people to your hottest deals, placing a large custom graphic in the middle of your high traffic areas, or showcasing your brand in a way that your customers will want to stop and admire, BILD<sup>TM</sup> is the product that will bring your concepts to life. With BILD Print Media, you can make a positive impression with lasting durability that is cost effective so you can continue to promote your brand, as often as you need to. Stand out from the competition by thinking outside of the box in how you bring your message to market. Don't just tell them, but show them! Get the conversation going amongst your customers and leave them talking about you long after they have left.

BILD Print Media is a one-of-a-kind product, designed as a grand-format print media, suitable for a wide range of free floating and permanent applications. BILD Clear is best suited for second surface printing, offering the most durable material wear layer in the industry

BILD print media is a 100% solid polyvinyl flooring solution. Without heavy fillers and foams, this material is both lightweight and completely recyclable. Combine that with the thickest wear-layer in the world, BILD print media is a floor that is guaranteed to outlast and outperform any other polyvinyl product that is produced.

Designed to print sharp graphics at any size gives BILD print media the advantage of fitting into any flooring environment. Complete a business office with a stunning stone floor. Integrate path-to-purchase strategies into a store to increase sales. BILD Print Media is the perfect solution to provide a stimulating, visual experience of your brand.
