FEATURES

Now introducing BILD SF (Sheet-Fed)! Here to change the offset printing industry and provide you with a high quality, cost effective material with lasting durability, BILD SF is the solution to a variety of printing needs. With the ability to be used for both flexible and rigid applications, BILD SF is a true utility material. As an extension of the BILD product line, BILD SF is designed for sheet fed, UV Printers, allowing you to mass print graphics quickly and with confidence they will last. BILD SF has the thickest wear layer in the industry, protecting your printed image for years to come, rather than fading from the surface. Resistant to daily occurrences of wear and tear, such as delamination, cracking, curling, peeling and more, BILD SF is a product with exceptional slip, stain and UV resistance! Finally, a product that reflects the quality of the brand you are promoting!

Interact with your customers, and promote your products using custom designed vinyl graphics. Whether you are looking to print floor mats, counter top mats, end cap displays, pole wraps, temporary wall graphics, way finders, or any type of branding or advertising, BILD SF is the product that will bring your vision to life, with the longest lasting durability. Don't just tell them about your products, but show them in a way that will get the conversation going.

BILD SF is designed for UV Offset Printing, suitable for a wide range of applications, from free floating to permanent. BILD SF is best suited for second surface printing to keep images protected and offers the most durable material layer. Avoid any product issues of cracking, bubbling, peeling or delamination by choosing BILD SF to build your image!

SPECIFICATIONS
