DIAMOND TREAD TRANSIT FLOORING

FEATURES

G-Floor® Transit Flooring by Better Life Technology is a signature line of high quality vinyl flooring purposefully-designed for easy installation and maintenance and perfect for both individual and commercial applications. Engineered for use by recreational enthusiasts, Original Equipment Manufacturers (OEM), business owners and fleet managers, our transit flooring is ideal for RVs, trailers, modular spaces, bus and rail lines and most other mobile units, offering exceptional value, performance and durability. G-Floor® is made with single piece construction so there are no weak points. Because of its vinyl coating, it is easier to handle than competitors, many of which are made of brittle and stiff materials. G-Floor® roll-out flooring makes it easy to install and trim to fit to accomplish a wall-to-wall, seamless look. This waterproof flooring is extremely beneficial in high traffic environments and can prevent future damage to subfloor. It is also resistant to most stains and is simple to clean with a damp mop or mild detergent or vinyl floor cleaner for a deeper clean. G-Floor® Transit Flooring will provide years of protection and look good doing it.

G-Floor® Diamond Tread texture for Transit is equipped with our revolutionary, cushioned Spun bound backer that grabs glue tight for ease of permanent installation. It also minimizes contraction and expansion often associated with other flooring products.

With its rugged and industrial look, Diamond Tread provides a strong traction and slip resistant surface for the transit segment. This long-lasting vinyl offers superior protection from excessive use, spills and common debris tracked in from outdoors; well-suited for RVs, haulers, trailers and modular use.

Diamond Tread is a rugged texture made up of standardized diamonds, which are 1.125in in length and 0.625in apart with a 0.030in relief, aligned diagonally in a 180° alternating pattern.

SPECIFICATIONS

Flooring Type:	Roll-Out
Surface Texture:	Diamond Tread
Gloss Level:	Matte
Size:	8ft 6in x 100ft
Wear Layer:	135 mil (0.135")
Base Thickness:	75 mil (0.075")
Composition:	Polyvinyl Composite
Installation Method:	Float/Glue

- Easy to install - DIY Trim & Fit
- No Adhesive Necessary
- Quick and Easy Clean up
- Waterproof
