IMAGED WOOD TRANSIT FLOORING

FEATURES

Better Life Technology's line of premium imaged flooring can take your transit space to a whole new level. When you want to impress customers and travelers, choose from one of four elegant wood styles, all protected by a wear layer so you won't sacrifice G-Floor® Transit Flooring's renowned function for beauty.

G-Floor Transit Flooring is a signature line of high quality vinyl flooring purposefully-designed for easy installation and maintenance and perfect for both individual and commercial applications. Engineered for use by recreational enthusiasts, Original Equipment Manufacturers (OEM), business owners and fleet managers, our transit flooring is ideal for RVs, trailers, modular spaces, bus and rail lines and most other mobile units, offering exceptional value, performance and durability. G-Floor is made with single piece construction so there are no weak points. Because of its vinyl coating, it is easier to handle than competitors, many of which are made of brittle and stiff materials. G-Floor roll-out flooring makes it easy to install and trim to fit to accomplish a wall-to-wall, seamless look. This waterproof flooring is extremely beneficial in high traffic environments and can prevent future damage to subfloor. It is also resistant to most stains and is simple to clean with a damp mop or mild detergent or vinyl floor cleaner for a deeper clean. G-Floor Transit Flooring will provide years of protection and look good doing it.

G-Floor Transit Flooring's wood-imaged design is equipped with our revolutionary, cushioned Spun bound backer that grabs glue tight for ease of permanent installation. It also minimizes contraction and expansion often associated with other flooring products.

G-Floor Transit Flooring elevates the appearance of RVs, workspaces, buses, railcars and other transit units. The non-repeating image is produced on a ceramic surface texture that won't scratch, crack, curl, peel or deteriorate under heavy use.

All G-Floor Transit Flooring premium imaged wood patterns are produced from polyvinyl composite and protected by a 75 mil (0.075") 100% clear polyvinyl wear layer. This ensures the embedded image will keep its great looks for the long haul.

SPECIFICATIONS

Flooring Type:	Roll-Out
Surface Texture:	Ceramic
Size:	8 ft 6 in × 60 ft
Wear Layer:	75mil (0.075")
Base Thickness:	75mil (0.075")
Composition:	100% Polyvinyl
Installation Method:	Float/Glue
Installation Grade:	Above, On, Below

- Easy to install - DIY Trim & Fit
- No Adhesive Necessary
